Annuities Training Platform Getting Started Guide for Producers

As the leading industry platform with several large carriers, RegEd's Annuity Training Platform is the solution for reducing this training burden and keeping producers focused on selling. The platform:

- ... Provides the ability for producers to meet multiple carrier requirements on one platform. RegEd's Annuity Training Platform makes it easy for producers to register and take the necessary state suitability and carrier-specific product training courses.
- ... Is the one place where distributors can see an agent's complete compliance profile for annuities training. This includes both the state suitability requirements and carrier-specific product training.
- ... Ensures producer compliance with the state suitability requirements for the states in which they sell annuities. The platform has an extensive rule base to determine reciprocity rules and initial and ongoing training requirements.
